

Lawyers Alert Continues Its Violence Against Women And Girls Engagement

DATE: 01/06/2018

In continuation of our project which seeks to reduce and eliminate violence against women and girls, Lawyers alert has added 5 states to its already existing 8, making it a total of 13 states.

In the last 6 weeks, Lawyers Alert has created partnership with key groups in these 5 states and we are currently liaising with several community women groups who report violations and access free legal services.

Even though the project is halfway implemented, we have recorded an estimated 59 reported violations, with free legal services now being offered to over 42 women.

Below are some of the pictures from the meetings respectively:
